Creation of a dataset on U.S. firm’s federal procurement contracts

Keywords: Data extraction, data linking

Project description
- The federal government is an important customer of U.S. companies
- The goal of this IDP is to create a structured dataset on U.S. firms relation to governments via government procurement contracts
- The challenge is to link company names in the procurement dataset to company names in a firm database
- The detailed task will include the following:
  - Extract government procurement data
  - Unify company names in the procurement dataset
  - Linking of company names to a firm dataset

What we are looking for
- Ideally team of 2 people
- Strong analytical and project management skills
- Determination and passion for your areas of expertise
- IT skills required for the IDP
- Interest to learn something about finance

What we offer
- Kick-off session including introduction to relevant finance topics
- Experience with IDPs
- Open dialogue and support
- Potential for publication and/or evaluation of future use cases
- Both single and group projects are possible
